The Honorable Eric H. Holder
Attorney General
U.S. Department of Justice
Washington, D.C. 20530

Dear Mr. Attorney General:

In recent months, various media reports have detailed the use of cell-site simulation technology, commonly referred to as “Stingrays” or “dirtboxes,” by Department of Justice (DOJ) component agencies.¹ The technology allows law enforcement agents to simulate a cell phone tower, which results in nearby mobile phones and other wireless communication devices connecting to the simulated tower instead of the phone carrier’s legitimate tower. When the mobile device connects, the simulation device can see and record the mobile device’s unique ID number and approximate location.

Committee staff has received briefings from multiple DOJ component agencies, including the Federal Bureau of Investigation (FBI), the U.S. Marshals Service (USMS), and the Drug Enforcement Administration (DEA), about their use of the technology and policies governing use of the technology. While the briefings were informative, we remain concerned that DOJ component agencies are not employing uniform legal standards before deploying cell-site simulation technology. We are also concerned about a number of the policies and procedures related to the technology, including those governing the use and retention of information collected by the devices, as well as those governing the use of the devices in conjunction with joint law enforcement operations conducted at the State and local level.

In addition, we are troubled that DOJ and its component agencies may be using non-disclosure agreements to impede Congressional and Judicial oversight of the use of these devices. We understand that there may be non-disclosure agreements between the component agencies and the manufacturers of these devices, as well as non-disclosure agreements between the component agencies and State and local law enforcement agencies. Media reports indicate that these non-disclosure agreements prevent signatories from producing information about the technology, even in response to a court order.²

² See Justin Fenton, *Baltimore Police used secret technology to track cellphones in thousands of cases*, BALTIMORE SUN (Apr. 9, 2015), available at <http://www.baltimoresun.com/news/maryland/baltimore-city/bs-md-ci-stingray-case-20150408-story.html#page=1> (discussing court testimony in which a local police officer acknowledged that the non-disclosure agreement “instruct[s] [him] to withhold evidence from the state’s attorney and Circuit Court, even upon court order to produce.”)

So that the Committee can better understand Department-wide policies surrounding the use of cell-site simulation technology, please provide the following documents as soon as possible, but no later than 5:00 p.m. May 8, 2015:

- (1) All Department-wide and component agency policies, guidance, or memoranda on the use of cell-site simulation technology.
- (2) All Department-wide and component agency policies, guidance, or memoranda on the use and retention of information collected by cell-site simulation technology.
- (3) All Department-wide and component agency policies, guidance, or memoranda on the use of cell-site simulation technology by any component agency of DOJ in conjunction with joint law enforcement operations conducted at the State and local level.
- (4) All Department-wide or component agency policies, memoranda of understanding, or non-disclosure agreements entered into by any component agency of DOJ with State and local law enforcement agencies regarding the use of cell-site simulation technology.
- (5) All policies, guidance, or memoranda on the use of DOJ grants and the total amount of money disbursed by DOJ to State or local law enforcement agencies to purchase cell-site simulation technology.
- (6) A list of all allegations against any component agency of DOJ regarding any potential misuse of cell-site simulation technology.
- (7) All documents related to the cost and possession of cell-site simulators in the possession of the component agencies of DOJ. In lieu of documents, DOJ can provide an inventory of the cell-site simulators in the possession of the component agencies of DHS. The inventory is to show for each agency:
 - a. the total number of such devices in possession of the agency;
 - b. the name, make, and model of the devices used by or in possession of the agency;
 - c. the total number of devices in possession of the agency for each make and model of device; and,
 - d. the cost of each individual device and the total amount each agency spent in fiscal years 2010-2014 on acquiring and using cell-site simulation technology.

In addition, please contact the Committee as soon as possible to arrange a briefing on this matter by May 1, 2015.

The Committee on Oversight and Government Reform is the principal investigative committee in the U.S. House of Representatives. Pursuant to House Rule X, the Committee has authority to investigate “any matter” at “any time.”

 - (c) If the production is completed through a series of multiple partial productions, field names and file order in all load files should match.
 - (d) All electronic documents produced to the Committee should include the following fields of metadata specific to each document;

BEGDOC, ENDDOC, TEXT, BEGATTACH, ENDATTACH,

8. When you produce documents, you should identify the paragraph in the Committee's schedule to which the documents respond.
9. It shall not be a basis for refusal to produce documents that any other person or entity also possesses non-identical or identical copies of the same documents.
10. If any of the requested information is only reasonably available in machine-readable form (such as on a computer server, hard drive, or computer backup tape), you should consult with the Committee staff to determine the appropriate format in which to produce the information.
11. If compliance with the request cannot be made in full by the specified return date, compliance shall be made to the extent possible by that date. An explanation of why full compliance is not possible shall be provided along with any partial production.
