Subject:	Datto remote access

Leif-

We are trying to tighten down every possible security angle on this customer. It occurs to us that anyone at PRN with access to the Datto Partner Portal (ie, everyone here) could potentially access this device via the remote web feature. Can we set up either two-factor authentication, or move this device to a separate partner account, or some other method (disable remote web altogether?) to allow only who we permit on our end to access this device via the internet?

The serial # in question is ███████

Let me know, thanks!

Paul
