Ron S. Jarmin, Ph.D.
Acting Director
U.S. Census Bureau
Department of Commerce
4600 Silver Hill Road
Washington, DC 20233

Dear Dr. Jarmin:

The Census Bureau has completed roughly half of the field testing for the 2018 end-to-end testing—the final opportunity to field test the more than 40 key information technology systems for the 2020 Census. However, many of the IT systems remain only partially delivered, or undelivered entirely. Delayed delivery of IT systems will negatively affect the Bureau's ability to successfully test systems and procedures, as well as execute the 2020 Census.

The Committee has previously questioned the Bureau's ability to conduct full and sufficient testing given IT delivery schedules and delays. On October 12, 2017, the Committee held a hearing where the Government Accountability Office testified that of the 43 IT systems to be tested during the 2018 end-to-end testing, only four had been fully delivered as of August 2017.¹ The Bureau has 39 systems whose delivery remains outstanding, with field enumeration and nonresponse follow-up testing beginning in March 2018.²

Timely delivery of the 2020 Census IT systems will affect not only the ability to fully test systems, but also build the necessary security measures to prevent unauthorized access and other cyber threats. The IT systems will require integration and scaling, which may be negatively affected by schedule delays. A single and consistently updated schedule of IT system delivery dates is crucial to ensuring systems are properly tested and secured prior to the 2020 Census. Recent changes in the Decennial Census Program leadership further increase the need for a consistently updated and unified IT schedule and critical path.³

In order to assist the Committee in its efforts to ensure a successful and accurate 2020 Census, please provide the following no later than December 8, 2017:

1. A list of the critical path of IT systems necessary for successfully carrying out the Bureau's 2020 redesign;
2. A copy of the most recent delivery schedule for all IT systems to be part of the 2018 end-to-end test;
3. An updated delivery and testing schedule for all IT systems to be used in the 2020 Census which is to be provided on a recurring monthly basis through April 1, 2020;
4. All documents referring or relating to the Bureau's revised baselining of the Census Enterprise Data Collection and Processing; and
5. All documents referring or relating to the Bureau's contingency planning for additional testing of IT systems that are not fully tested by the completion of the 2018 end-to-end testing.

An attachment to this letter provides additional instructions for responding to the Committee's request. In addition, please provide a list of dates upon which the new Associate Director of Decennial Programs can be made available for a briefing on recent changes to the Decennial Programs directorate.

Please contact Julie Dunne of the Majority staff at (202) 225-5074 if you have any questions. Thank you for your attention to this matter.

Sincerely,

Trey Gowdy

19. Upon completion of the document production, you should submit a written certification, signed by you or your counsel, stating that: (1) a diligent search has been completed of all documents in your possession, custody, or control which reasonably could contain responsive documents; and (2) all documents located during the search that are responsive have been produced to the Committee.
