

Congress of the United States

Washington, DC 20515

February 27, 2023

The Honorable Jennifer Granholm
Secretary
U.S. Department of Energy
1000 Independence Ave., SW
Washington, DC 20585

Dear Secretary Granholm:

The Select Subcommittee on the Coronavirus Pandemic is investigating the origins of COVID-19. Since April 2, 2020, Committee on Oversight and Accountability Republicans have been investigating the origins of the COVID-19 pandemic, including the Chinese Communist Party (CCP)'s role in obscuring the truth regarding the initial outbreak, and whether any U.S. taxpayer dollars funded the Wuhan Institute of Virology's (WIV) dangerous gain-of-function research.¹ The Select Subcommittee is now the only Committee in Congress with explicit jurisdiction to conduct this wide-ranging and important investigation.

This investigation will be a priority for the Select Subcommittee but also the global community. As stated by 18 experts in *Science* magazine, “[k]nowing how COVID-19 emerged is critical for informing global strategies to mitigate the risk of future outbreaks.”² Further, according to the *Lancet* COVID-19 Commission, “[i]dentifying [COVID-19’s] origins would provide greater clarity into not only the causes of the current pandemic but also vulnerabilities to future outbreaks and strategies to prevent them.”³ The origins of the disease that has taken the lives of more than six million people is still unknown.⁴ Uncovering the truth about the origins of COVID-19 is vital to U.S. national security, critical to the prevention of future pandemics, and will bring some semblance of closure to the families of those who lost loved ones during the pandemic.

Your Department has been at the center of the origins debate, oversees the U.S. National Laboratories, and interacts directly with the Intelligence Community (IC). Therefore your documents and testimony are essential to informing the Select Subcommittee about what the U.S. government knew regarding the origins of COVID-19 and when the government knew it.
