August 2, 2023

The Honorable Gina M. Raimondo  
Secretary  
U.S. Department of Commerce  
1401 Constitution Avenue N.W.  
Washington, D.C. 20230

Dear Secretary Raimondo:

The Subcommittee on Cybersecurity, Information Technology, and Government Innovation and the Subcommittee on National Security, the Border, and Foreign Affairs are investigating recent breaches of unclassified email systems at the Department of Commerce (Department).<sup>1</sup> According to recent reports, as part of a “suspected cyber-espionage campaign to access data in sensitive computer networks” by China, the breaches reportedly occurred at over two dozen organizations, including some U.S. government agencies.<sup>2</sup> In fact, your email account was among those accessed by hackers.<sup>3</sup> We request a briefing on the discovery of, impact of, and response to the intrusion.

The breaches appear to have occurred due to a “flaw in a Microsoft cloud-computing environment.”<sup>4</sup> In a post about the incident, Microsoft refers to the responsible entity as Storm-0558, a China-based threat actor that “primarily targets government agencies in Western Europe and focuses on espionage, data theft, and credential access.”<sup>5</sup> The “apparent espionage campaign infiltrated victims’ email beginning on May 15 and operated in stealth for more than a month, until June 16, when Microsoft began its investigation.”<sup>6</sup>

We are also concerned that this attack on federal agencies, including the email account of a senior U.S. government official such as yourself, reflects a new level of skill and sophistication from China’s hackers.<sup>7</sup> China appears to be graduating from “smash and grab heists” that used to be “noisy” and “rudimentary” to a level described by security experts as “among the most technically sophisticated and stealthy ever discovered.”<sup>8</sup> The incident even raises the possibility

that Chinese hackers may be able to access high-level computer networks and remain undetected for months if not years.<sup>9</sup> These concerns further underscore the warning provided in the National Cybersecurity Strategy issued earlier this year, which describes China as presenting “the broadest, most active, and most persistent threat to both government and private sector networks and is the only country with both the intent to reshape the international order and, increasingly, the economic, diplomatic, military, and technological power to do so.”<sup>10</sup>

To help the Subcommittees understand the discovery of the intrusion, impact of the intrusion at the Department, how the Department responded, and what the Department is doing to ensure the continued security of its email and overall information systems, we request a staff briefing as soon as possible but no later than August 9, 2023.

To schedule the briefing or ask any related follow-up questions, please contact Committee on Oversight and Accountability Majority Staff at (202) 225-5074. The Committee on Oversight and Accountability is the principal oversight committee of the U.S. House of Representatives and has broad authority to investigate “any matter” at “any time” under House Rule X. Thank you in advance for your cooperation with this inquiry.

Sincerely,

  
James Comer  
Chairman  
Committee on Oversight and Accountability

  
Glenn Grothman  
Chairman  
Subcommittee on National Security,  
the Border, and Foreign Affairs

Nancy Mace  
Chairwoman  
Subcommittee on Cybersecurity,  
Information Technology, and  
Government Innovation
